EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: This application is in condition for allowance except for the presence of claims 38-42 directed to inventions effectively non-elected without traverse in the response filed 28 November 2000. Accordingly, claims 38-42 have been cancelled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Although the prior art teaches the hydroxy alkylation of carboxylic acids using carbonates and phase transfer catalysts, the closest prior art as cited does not teach this reaction with polymers and specifically not with the functional polymers as required in the claims. One of ordinary skill in the art would be unable to reliably predict the effectiveness of the claimed reactants in treating the claimed polymers with any reasonable expectation of success. The possibilities of problems caused by polymer geometry as well as the possibility of conflicting reactivities from the functional groups of the specific polymers claimed renders the claimed process both novel and unobvious over the closest prior art as cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
